WORK EXPERIENCE

PT Samudera Agencies Indonesia

February- July 2025

Intrenship – SSL Division

Carriers Own Container Dapartment

- Approve container rental requests from branch teams based on applicable policies and procedures.
- Prepare and manage filing rates according to predetermined rates, then send them to the central team for further approval.
- Create and compile daily and monthly reports on container rental activities and connecting vessel movements, for reporting purposes.
- Learn about the factors that influence the determination of container rental rates, including shipping routes, container types, duration of use, and market conditions.
- Assist in inputting Profit and Loss (PNL) calculations for each container rental route based on predetermined rates, to support price feasibility analysis.

PT Jakarta International Container Terminal

November- December 2024

Intrenship – Operation Planning

Yard Plan

- Learn the flow of stevedoring and receiving/delivery activities at the container terminal to understand the port logistics process as a whole.
- Observe and learn efficient container stacking techniques in the stacking yard to minimize container shuffling.
- Assist the operational team in inputting preferred area data for import and export containers in the terminal system, to improve container placement efficiency.

Ship Plan

- Learned and assisted in the preparation of loading and discharge plans to ensure efficient vessel operations. Utilized planning systems to determine container stowage based on weight, type, and destination.
- Studying Crane Working Program to understand the distribution and efficient use of loading and unloading equipment at the dock.
- Assist in the input process of the Ship Landing and Operation Plan (RPKOP) using the PHINISI system to support accurate ship operational planning.
- Support the operational team in inputting the Loading and Unloading Activity Plan (RKBM) through the INAPORTNET platform, in accordance with port service standards.
- Assist in the preparation and update of the Berthing Window as part of the arrangement of ship berthing slots to run efficiently and on schedule.

Control Tower

- Learn the flow of crane movements and how to communicate effectively with crane operators in the field to support smooth loading and unloading operations.
- Monitor ongoing container loading and unloading activities in the field to ensure the process is running according to plan.
